This is an interesting home on a large lot. the home is one a one acre fenced area, above which is another 4 acres of steeply sloping land excellent for those with imagination. The home has been recently partially remodeled, including the kitchen and bathrooms. There is however work still to do to bring it up to today's standards. Some TLC will bring it to life again. The lower floor might work well for a home office with its office area a bedroom and full bath, leaving 3 bedrooms and 2 bathrooms above!
